SRINIVASU VADLAMUDI

Senior Flutter Developer and iOS Developer | Dart and Swift

Bangalore, Karnataka, India
+91 9505962262 | srinu11112000@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Senior Flutter and iOS Developer with 5 years of professional mobile development experience, including 1.6 years of native iOS development using Swift. Delivered 13+ production applications using Flutter, Dart, and Swift, with ownership of architecture, API integration, performance optimisation, and store releases. Led a team of 4 engineers on Richie, supporting 50,000+ users and achieving 100% crash-free performance.

TECHNICAL SKILLS

- **Mobile languages and frameworks:** Dart, Swift, Flutter, native iOS; cross-platform Android and iOS development, Flutter Web and Desktop
- **Architecture and state management:** Mobile application architecture, BLoC, Riverpod, GetX, reusable components, separation of concerns
- **Navigation and deep linking:** go_router, AppsFlyer OneLink, Adjust, Branch.io, LinkRunner, iOS Universal Links, Android App Links, navigation from push notifications
- **API integration and authentication:** REST APIs, WebSockets, Firebase Authentication, OAuth2, JWT, third-party SDK integration
- **Data and Firebase services:** Cloud Firestore, Supabase, PostgreSQL, Firebase Cloud Functions, Supabase Edge Functions, Firebase Remote Config
- **Push notifications and engagement:** Firebase Cloud Messaging (FCM), MoEngage, push notifications, in-app messaging
- **Product analytics:** PostHog, Google Analytics for Firebase (GA4), event tracking, screen analytics, conversion funnels
- **Payments and monetisation:** Stripe, Razorpay, Cashfree Payments, PayU, BillDesk, RevenueCat, Adapty, in-app purchases, server-side purchase verification, Google Play Developer API, AdMob, Meta Audience Network mediation
- **Mobile testing and automation:** Maestro, end-to-end mobile UI testing, integration testing, Firebase Test Lab, Firebase Local Emulator Suite
- **Crash reporting and performance:** Firebase Crashlytics, Sentry, production debugging, performance optimisation
- **Version control and repository platforms:** Git, GitHub, GitLab, Azure DevOps (Azure Repos), branching, pull requests, code reviews

- **CI/CD and release automation:** GitHub Actions, automated build and test pipelines, release workflows, Shorebird
- **App distribution:** App Store Connect, Google Play Console, App Store and Google Play submissions, versioning, production hotfixes
- **IDEs:** Visual Studio Code (VS Code), Android Studio, Xcode
- **AI development tools:** Claude Code, Cursor, Kilo Code, GitHub Copilot, MCP

Supporting backend and cloud skills: Python, FastAPI, Redis, pgvector, Row Level Security, Docker, Kubernetes, Nginx, Oracle Cloud, Firebase Hosting, Let's Encrypt, pytest, n8n.

Additional product engineering: React, Next.js, JavaScript, ML model serving, XGBoost, LightGBM, LSTM/Keras, Rasa, Anthropic Claude API, vector embeddings, semantic search.

PROFESSIONAL EXPERIENCE

Senior Product Engineer

Veloria Tech (OPC) Pvt. Ltd. | Remote, India | Mar 2026 – Present

AICRIX: AI Cricket Analytics Platform

Built and scaled to 5,000+ registered users, 761 monthly active users, and 1,000+ downloads in a single month, with subscription revenue.

- **End-to-End Ownership:** Own mobile app delivery and supporting services as a solo engineer, from architecture and API integration through monetisation, releases, and production support.
- **Monetisation:** Implemented RevenueCat subscriptions with server-side purchase verification using the Google Play Developer API and Supabase Edge Functions. Integrated AdMob and Meta Audience Network mediation for ad revenue.
- **Backend and AI Services:** Built FastAPI and Supabase services managing 15,000+ prediction records, giving the mobile app access to a 10-model ML ensemble and the Aira chatbot.
- **Reliability:** Maintain GitHub Actions checks, track production errors with Firebase Crashlytics and Sentry, and monitor service availability with StatusCake.

Arentzo: Peer-to-Peer Rental Marketplace

Rental marketplace across 4 categories: cars, bikes, electronics, and furniture.

- **End-to-End Ownership:** Own mobile and backend delivery from requirements through App Store and Google Play submission.
- **Core Features:** Built app flows and Supabase integrations for listings, authentication, payments, and subscriptions, and manage release preparation for iOS and Android.

- **Market Research:** Analysed 25+ competing platforms to shape product requirements, ASO metadata, and the pre-launch waitlist.

Tech Lead & Product Lead

Chase Alpha (Richie App) | Remote | Jul 2023 – Mar 2026

Led end-to-end engineering and product delivery for Richie, a fintech app serving **50,000+ users** on **iOS (4.6 stars)** and **Android (4.7 stars)**.

- Led and mentored **4 engineers**, running **2-week sprints** with planning, task allocation, and code reviews while staying hands-on in Flutter development.
- Maintained **100% crash-free performance** in production through proactive debugging, rapid hotfixes, and disciplined release management.
- Delivered a consistent **2-week release cadence** aligned with sprint cycles, shipping features and improvements to both stores on schedule.
- Shipped core features including investment advisory, social feeds, broker-connected trading, academy content, and subscription plans.
- Integrated **Zerodha and Angel One**, enabling users to connect their brokerage accounts and trade within the app.
- Owned backend architecture, authentication, and API integrations supporting financial workflows.
- Built **Rasabot**, a Python-based support and sales bot that autonomously resolved **92% of user queries**, increased sales by **15%**, and reduced support time by **90%**.
- Integrated **Razorpay** for payment flows and subscription payments.
- Integrated **Firebase Analytics (GA4)** and **MoEngage** for event tracking, **FCM** for push notifications, and **Branch.io** and **LinkRunner** for deep linking and attribution.
- Used **Shorebird code-push patches** to ship critical fixes without waiting for store review, shortening resolution time for production issues.
- Managed App Store and Google Play submissions and release versioning; worked with stakeholders to translate business requirements into technical specifications and prioritised roadmaps.

Live application: App Store | Google Play

Senior Flutter Developer & iOS Developer

AppKnit | Chandigarh, India | Dec 2021 – Jul 2023

Promoted from Flutter Developer to Senior Developer within **one year**. Delivered **9 production apps** across cross-platform Flutter and native iOS, all within agreed timelines.

- **Project ownership:** Led end-to-end delivery of **OpenKitchen** (food delivery and food-focused social media), **Sparks** (dating app for single parents), and **SwissSense** (basketball coaching), from design handoff through App Store and Google Play release.

- **Native iOS development:** Built **ShiftBOOKD**, a native iOS salon booking app, covering feature development, API integration, and App Store submission.
- **Flutter development:** Built and shipped **5 additional cross-platform apps**: **Groupia** (event booking), **Dopoxy** (learning platform), **Evexia** (health monitoring), **BEATBoXX** (boxing coaching), and **Guidel** (AI-based city guide).
- **API and backend integration:** Integrated REST APIs and backend services across projects and resolved production issues to maintain release stability.
- **Code quality and mentoring:** Reviewed code, set implementation standards, and guided engineers on reusable mobile components and backend integration.
- **Requirements and architecture:** Gathered client requirements, estimated delivery timelines, and recommended application architecture and technical approaches.
- **Cross-team collaboration:** Coordinated with design, backend, and product teams to manage scope, dependencies, and technical risk.
- **On-time delivery:** Delivered every project assigned as Senior Developer within the agreed timeline.

Intern – Flutter Application Developer

UnoLabs Private Limited | 15 Sep 2021 – 15 Dec 2021 | Hyderabad, India

Project: IoT Home Automation Application

- Developed responsive Flutter UI screens for an IoT home automation application, adapting layouts to different screen sizes.
- Implemented cross-platform UI components for consistent appearance and behaviour across Android and iOS.
- Integrated REST APIs to fetch and display application data, including loading states and error handling.
- Assisted with debugging, UI testing, and fixing layout issues; collaborated with senior developers to implement feedback and maintain reusable code during the **3-month internship**.
